CHEPURI JEEVANA KASTURI

jeevanakasturi@gmail.com LinkedIn GitHub LeetCode HackerRank

Phone : 90145 21929 Location : Tadikonda, Guntur district

SUMMARY

- Aspiring Software Engineer with strong proficiency in Python and solid foundations in Machine Learning, Deep Learning, and Data Structures Algorithms. Hands-on experience in building and training models, working with real-world datasets, and implementing end-to-end AI systems. Passionate about developing intelligent, scalable, and reliable solutions while continuously learning and contributing to impactful projects

EDUCATION

- **Bachelor of Technology in AI & ML** – VVIT, Nambur, Guntur, AP – CGPA: 8.85 — 2026
- **Intermediate** – Narayana Junior College, Guntur, AP – 936/1000 — 2020–2022
- **SSC** – Mary Matha E.M High School, Thullur, AP – 549/600 — 2020

SKILLS

- **Programming:** Python(Solved 135 Leetcode problems and 4-star silver badge on HackerRank), SQL(Solved 38 Leetcode Problems)
- **AI & ML:** Langchain, Machine Learning, Model Training, Data Preprocessing
- **Libraries & Frameworks:** Pandas, NumPy, Matplotlib, Scikit-learn
- **Core Concepts:** Data Structures & Algorithms, OOPs, SDLC
- **Tools:** Git, GitHub, SQLite, Excel
- **Soft Skills:** Quick Learning, Communication, Team Collaboration, Adaptability

EXPERIENCE

AI Intern – Data Filtering, Segmentation & Model Training(Aug 2025) — Away Space Covenant

- Conducted research on 7+ Earth Observation sensor types to understand their data characteristics, and processing workflows.
- Preprocessed satellite datasets through data cleaning, quality validation, and sensor-specific preprocessing to generate analysis-ready data.
- Developed a prototype U-Net segmentation model, trained for 300 epochs, achieving 95% accuracy.
- Collaborated with cross-functional teams, presented research findings to the team lead, and incorporated feedback to improve project outcomes.

PROJECTS

AI Disease Awareness Chatbot — Link

- Developed an AI chatbot using the Gemini API with system instructions to provide healthcare-related assistance.
- Built a Random Forest-based symptom checker trained on 3,000 records, achieving 99% test accuracy in disease prediction.
- Developed modules for health quizzes, vaccination information, and doctor-managed disease content.
- Tools: Python, Django, Scikit-learn (Random Forest), Gemini API, SQLite, GitHub, AWS EC2, VS Code

Oil Spill Detection in Marine Environments using AIS and SAR Data — GitHub

- Developed an AI-based oil spill detection pipeline by integrating AIS vessel tracking with SAR satellite imagery.
- Detected anomalies in AIS vessel movement using the Isolation Forest algorithm and retrieved the corresponding SAR images.
- Preprocessed the SAR image dataset by resizing and enhancing image quality, trained a U-Net segmentation model for oil spill detection, and automated the end-to-end pipeline using Apache Airflow with Docker containerization.
- Tools: Python, Apache Airflow, Docker, Scikit-learn (Isolation Forest), PyTorch (U-Net), SAR Imagery, AIS Data

CERTIFICATIONS

- AWS Cloud Foundations - AWS
- CS50's Python Programming – Harvard University
- Joy of Computing Using Python - IIT Madras
- Cloud Computing - IIT Madras
- Python – HackerRank
